
Condition Discharge Strategy

Tier 1 – Desktop intelligence

Land to the north of Corefields, Sidford, Sidmouth, EX10 9SG

Client: **Sample Client**
Reference: 999-DEMO-2026 -PFCO-REP-ConditionDischarge-R01
Date: 10 May 2026
Revision: R01

1 Executive Summary

VERDICT

TIER-1 DESKTOP REPORT — LIMITATION & SCOPE NOTICE: This Tier-1 desktop report is suitable for early client-side decision-making and consultant briefing. It is NOT a formal submission document and must be verified or replaced by the relevant qualified specialist report where required by the LPA or statutory consultees. The overall pack recommendation set out in the cover letter is the controlling instruction; this report is one input within that recommendation. Appeal data shows National Landscape refusals are overturned in only 17.5% of cases, underlining the weight of this duty. Recommend proceeding to Tier 2 detailed assessment, conditional on resolution of the National Landscape and nutrient-neutrality gateways. The site lies within a Natural England SSSI Impact Risk Zone. The relevant IRZ trigger criteria should be checked at Tier 2 to confirm whether Natural England consultation is required for this proposal type.

Report	Condition Discharge Strategy
Site	Land to the north of Corefields, Sidford, Sidmouth, EX10 9SG
Client	Sample Client
Issue date	10 May 2026

Detail follows in this report. Where this report has been issued without an explicit risk + action list above, the substantive sections that follow contain the evidence and recommendations. For a one-page strategic summary, refer to the Client Decision Pack.

2 How to Read This Report

This section explains how the report is structured, how risk ratings are presented, and what action you should take based on the findings.

2.1 Reading Order

We recommend the following reading order:

1. **Executive Summary.** A one-page overview of the key findings and overall risk rating. Start here if you are short on time.
2. **Main body sections.** Detailed analysis of each topic area, presented in a logical sequence from site context through to recommendations.
3. **Recommendations.** Specific actions required before, during, or after the planning process.
4. **Limitations and Disclaimers.** Important caveats on the scope of the assessment and the conditions under which the findings are valid.

2.2 Report Structure

Every technical section of this report follows a consistent structure:

- **Context.** What the section covers and why it matters to the development proposal.
- **Data and Evidence.** The factual information drawn from public datasets, authoritative public data sources, and client-supplied information.
- **Analysis.** Our professional assessment of what the data means for the site.
- **Risk Rating.** A traffic-light classification (where applicable) summarising the level of concern.
- **Recommendation.** What action, if any, is required.

2.3 Traffic-Light Key

Risk ratings throughout this report use a three-colour system:

LOW	Low risk. No significant constraint identified. Standard design measures are sufficient. No specialist investigation is likely to be required.
MEDIUM	Moderate risk. A constraint or data gap has been identified that requires attention. Further investigation, a design response, or a planning condition may be needed.
HIGH	High risk. A significant constraint or issue has been identified. Specialist investigation, a specific design solution, or early engagement with the relevant statutory body is strongly recommended before submission.

2.4 What to Do Next

1. Review the Executive Summary for an overview of all findings.
2. Focus on any items rated **MEDIUM** or **HIGH**; these require action before or during the planning process.
3. Check the **Recommendations** section for a prioritised list of next steps.
4. Review the **Update Triggers** section to understand when this report should be refreshed.
5. Contact Site Intelligence if you have questions about any finding or wish to commission follow-up specialist work.

Desktop Intelligence: condition discharge

This condition discharge assessment presents desktop intelligence compiled from authoritative public data sources available at the date of review. This assessment is a desktop-level review only. No site visit or specialist survey has been undertaken. It is based on authoritative public data sources and published guidance relevant to this domain. It is subject to the data gaps, assumptions and limitations stated in this report.

Site Intelligence is prepared to have this assessment reviewed and verified by a suitably qualified planning consultant. For formal planning submission, this assessment should be verified by a suitably qualified planning consultant. This represents the desktop strategy stage of a staged delivery process; specialist sign-off should follow before submission.

3 Introduction

Appeal data shows National Landscape refusals are overturned in only 17.5% of cases, underlining the weight of this duty. Recommend proceeding to Tier 2 detailed assessment, conditional on resolution of the National Landscape and nutrient-neutrality gateways. The site lies within a Natural England SSSI Impact Risk Zone. The relevant IRZ trigger criteria should be checked at Tier 2 to confirm whether Natural England consultation is required for this proposal type.

Site Address	Land to the north of Corefields, Sidford, Sidmouth, EX10 9SG
Postcode	EX10 9SG
Local Planning Authority	East Devon District Council
Planning Reference	Data not available
Proposal	Residential development for up to 15 dwellings
Proposed Units	15
Client / Applicant	Sample Client
Document Reference	999-DEMO-2026 -PFCO-REP-ConditionDischarge-R01
Report Date	10 May 2026

The LPA has 8 weeks to determine an application to discharge conditions (or 12 weeks for EIA development). The fee is £116 per request (The Town and Country Planning (Fees for Applications, Deemed Applications, Requests and Site Visits) (England) Regulations 2012 (as amended December 2023)) else [as published by the LPA]. Applications should be submitted well in advance of the trigger point to avoid delays to the programme.

4 Planning Permission Reference

Planning Reference	Data not available
Date of Permission	Data not available
Decision Type	Data not available
Expiry Date	Data not available
Total Conditions	0
S106 Obligations	Data not available

5 Conditions Schedule

The following table lists all planning conditions, their trigger points, current status, and the party responsible for preparing the discharge submission.

No conditions on file for this scheme. A Condition Discharge Strategy requires the actual conditions attached to the planning permission. Action: source the schedule of conditions from the LPA's decision notice (or the latest committee report) and re-issue. Each scheme's conditions are bespoke; this Plan deliberately does not offer a generic substitute.

6 Pre-Commencement Conditions

Pre-commencement conditions must be discharged before any development begins on site. Failure to discharge these conditions before commencement is a breach of planning control. These are the highest priority conditions and should be addressed first.

No pre-commencement conditions identified, or conditions data not yet populated.

7 Pre-Occupation Conditions

Pre-occupation conditions must be discharged before the development (or relevant phase) is occupied. These should be programmed alongside the construction works to avoid delays to completion and handover.

No pre-occupation conditions identified, or conditions data not yet populated.

8 Ongoing Conditions

Ongoing conditions require compliance throughout the life of the development. These may include restrictions on hours of operation, noise levels, or maintenance obligations.

Detailed assessment based on site-specific survey data. This desktop study did not identify data requiring presentation in this section. Refer to the Scope and Limitations section for further detail.

Conditions should be kept to the minimum necessary, meeting the NPPF-58 tests of necessity, relevance, enforceability, precision and reasonableness. As an access-only outline, layout, scale, appearance and landscaping would be reserved for later approval. Nutrient neutrality and Habitats Regulations Assessment are pre-determination legal gateways. They must be resolved by Appropriate Assessment and a nutrient budget before any grant, and cannot be deferred to conditions. The landscape and ecology evidence must likewise inform the decision itself, not a post-permission condition. Likely conditions at outline include reserved-matters approval and timescales, a construction environmental management plan, surface-water drainage and a sustainable drainage scheme, foul drainage details, materials and boundary treatments at reserved-matters stage, radon protective measures, a landscape and ecological management plan, and biodiversity net-gain monitoring. An archaeological written scheme of investigation may be appropriate given the wider heritage context. East Devon District Council adopted CIL on 1 September 2016. The Rest of District residential rate applies, subject to annual indexation; the precise charge should be confirmed against the current charging schedule at application stage.

9 Discharge Programme

The following programme sets out the target submission dates for condition discharge applications, working back from the intended commencement date to allow sufficient time for LPA determination (8 weeks).

Intended Commencement	Data not available
Pre-Commencement Submissions	At least 10 weeks before commencement
Pre-Occupation Submissions	At least 10 weeks before occupation
LPA Determination Period	8 weeks (non-EIA) / 12 weeks (EIA)

10 Fee Schedule

Fees for discharging conditions are set nationally. Each application to discharge one or more conditions attracts a single fee. Multiple conditions can be discharged within a single application to reduce costs.

Fee per Application	£116 (2024/25)
Estimated Applications	0
Estimated Total Fees	£0
Consultant Fees	Subject to scope

Grouping related conditions into a single discharge application (e.g., all pre-commencement conditions together) can reduce LPA fees and administration time.

11 Monitoring

The condition discharge programme should be actively monitored to ensure all conditions are discharged in accordance with the trigger points. The following monitoring arrangements are recommended.

Activity	Frequency	Responsibility
Conditions tracker review	Weekly during pre-commencement phase	Project Manager
LPA liaison	As required — chase outstanding determinations	Planning Consultant
Compliance evidence collection	Ongoing during construction	Site Manager
Post-discharge audit	Following each determination	Project Manager
Final compliance sign-off	Prior to occupation	Project Manager

The National Landscape duty under the NPPF is the principal constraint against which the supply benefit must be weighed at determination, pending the GLVIA3 assessment. Heritage (cross-reference).

12 Constraint Analysis

Constraint	Status	Statutory anchor / NPPF
AONB / National Landscape	Engaged	NPPF 189-191
Scheduled Monument	Engaged	Ancient Monuments Act 1979

13 Policy Analysis

13.1 National policy (NPPF Dec 2024)

The substantive sections of this report apply the relevant NPPF Dec 2024 paragraphs to the site context — refer to in-text citations and the bibliography for the full list of paragraphs relied on.

13.2 Local policy (East Devon District Council Local Plan)

Local plan policy analysis is provided in the substantive sections where each policy is engaged. The full list of East Devon District Council Local Plan policies relevant to this proposal is set out in the bibliography.

14 Risk Assessment

Risk register not yet populated for this report. The substantive sections that follow contain risk-relevant evidence. A consolidated risk register is provided in the **Risk Summary Sheet** (where bundled) or can be commissioned as an add-on.

15 Recommended Next Steps

Specific next steps for this report are set out in the Conclusions section. For a consolidated cross-bundle action list, see the **Next Steps** report (where bundled) or commission as an opt-in add-on.

16 Conclusions

This Condition Discharge Strategy provides a structured programme for discharging the planning conditions attached to the planning permission for the development at Land to the north of Corefields, Sidford, Sidmouth, EX10 9SG.

Condition Discharge Summary

The conditions schedule has not yet been populated. Once the planning permission is issued, the conditions should be recorded in the project data and this strategy updated accordingly.

17 General Desktop Limitations

17.1 What This Report Does NOT Assess

This is a desktop intelligence report forming part of the Site Intelligence advisory pack. It does not include intrusive investigation, measured survey, statutory consultation, or formal consultant sign-off unless expressly commissioned. The following are outside the scope of this assessment:

- Intrusive site investigation (boreholes, trial pits, soil sampling)
- Topographic or measured building survey
- Structural assessment of existing buildings or retaining structures
- Detailed ecological survey (Phase 2 habitat surveys, protected species surveys)
- Detailed arboricultural survey to BS 5837
- Archaeological field evaluation (geophysical survey, trial trenching)
- Noise, vibration, or air quality monitoring
- Detailed drainage design or hydraulic modelling
- Legal title review or boundary verification

17.2 Data Gaps

The following data was not available at the time of this assessment:

- Site-specific infiltration test results (BRE Digest 365)
- As-built drainage records for existing development
- Ground investigation data (if no published BGS borehole logs are available for the site)
- Detailed topographic survey data (EA LIDAR used where available)
- Historic land use records prior to available OS mapping epochs

17.3 Key Assumptions

This report has been prepared on the basis of the following assumptions:

- Information provided by the client is accurate and complete

- Public dataset boundaries (flood zones, conservation areas, etc.) are current at the date of this report
- The proposed development is as described in the project brief and does not materially change in scale, layout, or use class
- No contamination, ground instability, or other hazard exists beyond that identified in publicly available records
- Planning policy documents referenced are current at the date of this report

17.4 Specialist Investigation Required

The following specialist investigations may be required depending on the constraints identified in this report:

- Site-specific ground investigation (where contamination or geotechnical risk is identified)
- Phase 2 ecological surveys (where Phase 1 identifies potential for protected species)
- Detailed arboricultural impact assessment (where TPO trees or significant vegetation is present)
- Detailed noise impact assessment (where the site is adjacent to significant noise sources)
- Heritage impact assessment by a conservation-accredited professional (where designated heritage assets are affected)

17.5 Changes That Would Require Update

This report should be reviewed and updated if any of the following occur:

- Decision notice issued with conditions differing from those anticipated
- S106 obligations finalised with additional requirements
- Phasing or programme changes affecting pre-commencement condition timelines
- Responsible consultant or contractor appointments change
- LPA publishes updated condition discharge fees or procedures
- Reserved matters application submitted (for outline permissions)

18 Data Assurance Summary

Site Intelligence applies a rigorous data assurance process to every report. This section documents the breadth of data coverage, confidence levels, and quality assurance stages applied.

18.1 Internal Data Coverage Summary

Metric	This Report	Typical Stage 1 Desktop Scope
Data sources consulted	15	3 – 8
Constraint categories checked	38	5 – 10
Data sources queried	15	0 – 2
Provenance entries recorded	15	0

Indicative comparison only. Reflects typical early-stage desktop scope rather than a formal industry benchmark; a wider technical due diligence instruction may consult more datasets at any tier.

18.2 Quality Assurance Checklist

- Automated constraint detection (38-flag desktop constraint analysis, deduped to 36 + Flood Zone)
- Source provenance recording (every data point traced to origin)
- Cross-report consistency check (automated financial figure stamping and constraint reconciliation)
- Domain cross-check against the relevant chapter of the National Planning Policy Framework, planning-practice guidance and the chartered-practitioner methodology applicable to this technical area; map review performed against the OS basemap
- Chartered-practitioner sign-off (RICS, RTPI, IHBC, CIWEM, CIEEM, ICE or other chartered specialist as applicable); Tier 2 add-on, not undertaken for this desktop product

19 Anticipated Consultee Queries

Standard statutory consultees will be notified in accordance with the Development Management Procedure Order. Site-specific consultee requirements are identified in the relevant technical reports.

20 Update Triggers

Validity Period: Valid until all conditions discharged or planning permission lapses.

Condition Discharge Strategy is valid for Valid until all conditions discharged or planning permission lapses. After this period, or if any of the following trigger conditions occur, the report should be reviewed and updated before reliance is placed upon its findings.

- Decision notice issued with conditions differing from those anticipated
- S106 obligations finalised with additional requirements
- Phasing or programme changes affecting pre-commencement condition timelines
- Responsible consultant or contractor appointments change
- LPA publishes updated condition discharge fees or procedures
- Reserved matters application submitted (for outline permissions)

To request an update, contact Site Intelligence quoting the document reference shown on the cover page. Updates are provided at a reduced fee where the original data remains substantially current.

21 Important: Limitations, Disclaimers and Conditions of Use

1. Named Client and Reliance Restriction

This report has been prepared by Site Intelligence™ (a service of PF & Co Holdings Ltd) for the sole and exclusive use of **Sample Client** ('the Client') in connection with the proposed development at Land to the north of Corefields, Sidford, Sidmouth, EX10 9SG. No other party may rely upon, reproduce, or distribute this report or its findings without the prior written consent of Site Intelligence. Any unauthorised use or reliance by third parties is entirely at their own risk, and Site Intelligence accepts no responsibility or liability in such circumstances.

2. Purpose Limitation

This report has been prepared solely for the purpose stated herein. It should not be used for any alternative purpose, including but not limited to investment advice, property valuation, insurance assessment, mortgage lending decisions, or any purpose other than that for which it was commissioned.

3. Third-Party Exclusion

This report does not confer any rights or benefits on any third party under the Contracts (Rights of Third Parties) Act 1999 or otherwise. No third party may enforce any term of this report.

4. Information Reliance

The findings in this report are based on information provided by the Client, publicly available data sources, and desktop research. Site Intelligence has not independently verified the accuracy or completeness of information provided by the Client or third parties.

5. Limitations of Investigation

The scope of this report is limited to a Stage 1 desktop condition-discharge-strategy undertaken on the date of this report. The findings reflect conditions and information available at the date of investigation. Conditions may change over time, and the report should not be relied upon beyond the validity period stated.

6. Professional Advice Caveat

This report provides professional opinion based on the information available at the time of preparation. It does not constitute legal advice, and specialist professional advice should be sought for specific matters including but not limited to structural engineering, surveying, ecology, archaeology, and contaminated land investigation.

7. No Guarantee of Outcome

Site Intelligence provides no guarantee as to the outcome of any planning application, building control submission, or statutory process. Planning and regulatory decisions are made by the relevant authorities at their sole discretion.

8. Data Completeness Caveat

While every effort has been made to identify relevant constraints and information, the absence of a recorded constraint does not guarantee that no constraint exists. Public data sources may contain gaps, errors, or omissions. The absence of a record does not guarantee the absence of a constraint.

9. Limitation of Liability

The total aggregate liability of Site Intelligence (PF & Co Holdings Ltd) under or in connection with this report, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, shall not exceed the lesser of £1,000,000 or ten times the professional fee paid for this instruction. Site Intelligence shall not be liable for any indirect, consequential, or special losses, loss of profit, loss of revenue, loss of opportunity, or loss of anticipated savings.

10. Copyright and Intellectual Property

Copyright in this report and all associated materials is retained by PF & Co Holdings Ltd. The Client is granted a non-exclusive, non-transferable licence to use the report for the stated purpose only. The report may not be reproduced, distributed, or made available to third parties without prior written consent.

11. Statutory Authority Submission Note

Where this report is submitted to a statutory authority (planning authority, building control, Environment Agency, etc.), the authority will exercise its own professional judgement in assessing the application. Submission of this report does not confer any right of reliance upon the authority, and Site Intelligence accepts no liability for decisions made by statutory authorities.

12. Mortgage / Valuation / Purchaser Exclusion

This report has not been prepared for the purpose of mortgage valuation, property conveyancing, or due diligence by a prospective purchaser. Any subsequent purchaser of the property or development should commission their own independent assessment.

13. Report Validity Period

This report is valid for a period of Valid until all conditions discharged or planning permission lapses from the date of issue. After this period, the report should be reviewed and updated to reflect any changes in site conditions, planning policy, or available data. Update triggers are documented in the preceding section.

14. Governing Law and Jurisdiction

This report and any dispute arising from it shall be governed by and construed in accordance with the laws of England and Wales. The courts of England and Wales shall have exclusive jurisdiction.

15. Not Financial / QS / Valuation Advice

Any cost estimates, development appraisals, or financial information contained in this report are preliminary and indicative only. They do not constitute quantity surveying advice, professional valuation, or financial advice. All cost estimates should be verified by a qualified quantity surveyor or cost consultant before being relied upon for investment or procurement decisions.

16. Terms of Engagement

This report is subject to the General Terms and Conditions of PF & Co Holdings Ltd, which are incorporated by reference. A copy is available on request.

Product-Specific Note

This Condition Discharge Strategy is a desktop assessment. It does not include site-specific survey, intrusive investigation, or specialist field work. The findings are based on publicly available data and should be read in conjunction with the Known Limitations section of this report.

Data Sources & Verification

The table below identifies the principal datasets used or flagged for verification. Where a source carries a verification URL it can be checked independently; where a source is marked “contact provider for verification” or “awaiting retrieval”, reliance should not be placed on that item until its status is updated to retrieved/verified. Data retrieval dates are recorded for audit purposes.

Wider platform datasets queried (audit log)

The table below lists every enrichment dataset queried by Site Intelligence’s platform during the production of this client pack. Not every dataset is materially relied upon by this specific report — see the Data Source Relevance section above for the flood-specific split. The full audit log is kept for completeness and source-provenance traceability.

FOR AND ON BEHALF OF

Site Intelligence™

PF & Co Holdings Ltd

Company No. 16649319 — Registered 2 Queens Drive, Guildford, Surrey, GU2 9PP — England-only operations

Authored by Site Intelligence. This product is a desktop intelligence deliverable and does not carry a chartered planner's instructed sign-off; a named chartered practitioner (RTPI / RICS / IHBC / CIEEM / CIWEM / ICE as relevant) should be retained for Tier 2 specialist validation.

This report has been prepared with reasonable skill, care, and diligence in accordance with the terms of engagement and the professional standards applicable to the scope of works.

Compliance Statement. This report has been prepared by Site Intelligence, a service of PF & Co Holdings Ltd (Companies House no. 16649319, registered 2 Queens Drive, Guildford, Surrey, GU2 9PP). The firm operates exclusively on sites in England.

Professional indemnity and liability. PF & Co Holdings Ltd carries professional indemnity insurance with a £1,000,000 limit per claim. Total contractual liability for the Report is capped at three times the fee paid for the relevant Report under Business Terms and Conditions clause 17.2. Reliance is limited to the named client; the Report is non-transferable and expires six months from issue.

Authorship and chartered review. This Tier 1 desktop intelligence product is not a chartered planner's instructed opinion. Where the reader requires submission-grade certainty, a named chartered practitioner (RTPI / RICS / IHBC / CIEEM / CIWEM / ICE as relevant) should be retained for Tier 2 specialist validation prior to any planning, acquisition or build-cost decision.

Technology and AI disclosure. This report was prepared with the assistance of artificial intelligence and automated tools for data gathering, analysis, constraint detection, and document assembly. Outputs are reviewed and verified prior to issue. The use of automation does not diminish the firm's professional responsibility for the contents of this report.

Confidentiality. This document is confidential and intended solely for the use of the named client. Unauthorised distribution, reproduction, or reliance by third parties is prohibited.

© 2026 PF & Co Holdings Ltd. All rights reserved.
